PROJECTS at Intuit
Project: KPI's for QB Reports and Business Insights
Description: Built KPI's for QB customers using react and redux. Chartjs and HighCharts were used for the graphical representation.
Project: Admin tool for Contact US Application Project
Description: Admin tool is an internal tool built for QuickBooks care team. This tool has saved lot of time of QuickBooks care agent in publishing articles for QuickBooks user. This is built using React JS. This tool provides interface to add article for any (product X region) in QuickBooks. Articles saved via this tool is pushed to Code Commit which is an AWS service. On publish from this tool the content is moved from code commit to MySQL.

Project: Migration from Live Person to ININ

Description: Prechat form UI interface was built using React JS from scratch. This removed the dependency of live person PreChat UI. QuickBooks customer can talk to care agent via various channels one such channel being chat. As a part of this project, we built a pre-chat UI form which comes up for the user when he wishes to talk to a care agent.

ACHIEVEMENTS

- Stood **3rd** in 24hour Hackathon on Machine Learning conducted in our BU in **Intuit**.
- Won prizes for Weekend Coding Challenge to build small medium business finder (SMB Finder) for QBO India Sales Team.
- Speaker at Intuit India TWI-IWN 2017 Women's Day edition on Benchmarking JavaScript Frameworks.

POSITIONS OF RESPONISIBILITY
